Creating a slide show is a great way to share precious memories with children and parents, but it can be a great job, especially at the end of the school year. This tutorial will show you how to use an app to create a quick and easy slide presentation on your iPad. That's one more thing you can check your long task list! Photo Slideshow Director HD Pro App When I was in Mississippi this winter a teacher asked me if I had a favorite app to create slide shows. At that time I didn't have one so I did a search and found this app called Photo Slideshow Director HD Pro. I did a little research and Take the Molo for \$ 3.99; They were the best four dollars I've spent! This application makes those long hours that you were going through your computer creating slide presentations with PowerPoint a thing of the past. On on 7 I'm gonna go 4 I os swohsedils gniatrc ysub erew uoy dias uoy fo ynaM. raey looncs eht fo dne eht rof tsil od-ot ruoy no saw tahw uoy deksa yltneer l egap koobecaf koobecaf The slide presentation with a public is connected directly to its projector using an Apple VGA adapter cord. After choosing to save your slide presentation, you can choose to play directly from the application or export it. One of the savings options allows you to save the submission of slides to the Cámara roll. Once you have saved your slide presentation to the Cámara roll, you can send it by email to yourself (if not too large), then keep it to your computer. Exporting Dropbox is also a very easy way to save the file so you can access you on your computer. Export options allow you to reflect your slide presentation on your TV, or upload it to Facebook, YouTube and Dropbox directly from the application if you prefer. If you are wondering how long it took me to create a slide presentation from beginning to end, true? Including the time I cost me session in my iTunes account and download the application that took me twenty minutes. The majority of that time was adding text to images. I already had all my slide presentation photos in an album that upload them was a breeze. No text to all the images, only those that appeared in a first category. Please keep in mind that I am not affiliated with this application at all, I just found that it is really a Étíl. If you are not familiar with the Internet, how your device works, or the application store, then perhaps this is not the best option for you. Burning its end of a slideshow to a DVD here are my thoughts in burning its DVD slide presentation: If, it can be made easily DVDs are expensive, especially if you have a large class or two classes a DVD must be shown to people in person a DVD must be reproduced in a player DVD is a long time to burn a great number of DVDs that I believe in working more intelligent, not more differ. I encourage you to consider the following points below when it comes to recording your DVD slide presentation: DVDs will not be close to time, do you remember the cassette tapes?
